

Tech Tip:

Worksheet Generator

Create math and vocabulary worksheets to print out easily from the web!

Tips and Tricks

1. Make multiple unique worksheets

You can easily create a different worksheet for each student in your class by creating your first worksheet, pressing your "back" button on your browser and pressing the "Create" button again to create another one from the same data. Each worksheet you create will contain the same problems, but the problems will be organized or scrambled differently. This only applies to the following worksheet templates:

[Scramble](#) [Word Chop](#) [Matching](#)
[Fill in the Blanks](#) [Mix Up](#)
[FOIL](#)

2. Save your worksheets

Save your created worksheets in your own [Custom Classroom account](#). Register with My DiscoverySchool and select "Custom Classroom" on the form. Within minutes you will have your own account where you can save worksheets, puzzles and quizzes and access them from anywhere!

3. Use Puzzlemaker word lists

DiscoverySchool.com also has a great tool where you can make customized puzzles called [Puzzlemaker](#). We have created pre-defined vocabulary lists for science topics, history topics and holidays. Visit the [Puzzlemaker word lists section](#) and copy and paste the word lists to create worksheets or puzzles!

4. Student created worksheets

Have students create worksheets to challenge their classmates.

Go to

<http://school.discovery.com/teachingtools/>

1. Look for the Worksheet Generator link
2. Choose your worksheet template from the list. You can view examples of each.
3. Input the variables and create!
4. See the Tips and Tricks to the side for other ideas.

The screenshot shows the DiscoverySchool.com website interface. The address bar displays <http://school.discovery.com/teachingtools/teachingtools.html>. The website has a green header with the DiscoverySchool.com logo and navigation tabs for Home, For Students, For Teachers (selected), and For Parents. A search bar is located in the top right. The main content area is titled "Teaching Tools" and includes a description: "DiscoverySchool.com offers teachers of all subjects an array of powerful tools to create your own materials." Below this are several tool cards: "Puzzlemaker" (Generate your own educational crossword puzzles, math squares, word searches, and more), "Lesson Planner" (Create and store your customized lesson plans for easy access), "Quiz Center" (Take advantage of the most powerful quiz-making tool online), and "Worksheet Generator" (Create custom worksheets for almost any subject).
